

# 5 LITER LIQUID OXYGEN CONVERTER BY ESSEX INDUSTRIES

Essex LOX converters for air medical transport are available in 5 liter and fixed and removable installations.

## REMOVABLE

A two-piece mounting base with a single wing nut provides easy removal from the aircraft.

The converter has one quick disconnect port for the external heat exchanger, valving and plumbing.

## FIXED

Interface panel connects all the necessary external plumbing, including the fill/combo valve, heat exchanger, overboard vent and LOX quantity gauge.

## EFFICIENT

Supplies up to 4300 gaseous liters of oxygen to an aircraft pilot and crew at 75 to 120 psig, despite weighing approximately 16 lbs empty and 29 lbs full.

## QUALIFIED & APPROVED

Designed to MIL-DTL-19328 and tested to MIL-STD-810.
