

# 60 KVA MAIN GENERATOR UPGRADE BY HONEYWELL AEROSPACE

Honeywell electric power generators and voltage regulators have supported aerospace fleets worldwide for more than 60 years.

The 60kVA Main Generator System Upgrade by Honeywell Aerospace improves mission-effectiveness and war-fighter safety by increasing generation capability to power avionics, radars, safety systems, jamming equipment, radios and other electronic systems all at the same time.

## ENHANCED PERFORMANCE

Increased capability to power aircraft systems all at the same time.

## INCREASED POWER DENSITY

33% more power than legacy generators.  
60kVA kVA adds 15kVA per aircraft.

## FIELD PROVEN

Fleet optimization with superior power

## LOW RISK

Same interface means a simple installation that is a drop-in replacement requiring no modification\* to the GCU or the need for a new GCU wiring harness.

\*If return hose assembly is replaced.
